Administration:
Associate Dean for Academic Affairs, Babette J. Neuberger

The School of Public Health is dedicated to excellence in protecting
and improving the health and well-being of people around the world by
educating public health professionals and the community, conducting
research and affecting public health policy.

Through its diverse educational programs, centers, institutes, and
collaborations, the school represents a formidable and unique
educational resource in the city of Chicago. Situated on one of
the nation’s most diverse campuses in one of the world’s largest
concentrations of advanced public and private healthcare facilities, it
offers students extensive opportunities to translate classroom learning
into hands-on experience and engaged research. Students have access
to nearly all aspects of public health—locally, statewide, nationally, and
internationally. The intellectual vibrancy within the school, paired with the
vitality of Chicago and its multicultural communities and neighborhoods,
provides an outstanding educational setting for the preparation of future
public health practitioners and leaders.

The School of Public Health offers two professional degrees:

1. Master of Public Health (MPH)
2. Doctor of Public Health (DrPH)

The MPH provides graduates with a general understanding of the
field of public health along with specific expertise in a selected area
of study. Students matriculate into one of four divisions: Community
Health Sciences, Environmental and Occupational Health Sciences,
Epidemiology and Biostatistics, or Health Policy and Administration.
The comprehensive program, which may be completed in two years,
includes course work inside the classroom and field experience that
culminates in the completion of a capstone project. A shorter professional
enhancement program is available for those who already possess three
or more years of practice in the field. The program may be completed in a
distance-based or residential format.

The DrPH program is the advanced professional degree offered by the
school. This program is tailored to meet the goals of midcareer public
health professionals who want to expand their knowledge and practice of
public health and attain the leadership skills necessary to enable them to
advance the field. The program aims to help students become leaders of
the public health community at the local, national and international levels.
The program is offered in a distance-based format.

The school encourages collaborations between other schools by
offering joint degree programs including MBA/MPH, MD/MPH, MA in
Anthropology/MPH, DVM/MPH, MSW/MPH, as well as a coordinated
JD/MPH with IIT Kent College of Law and a coordinated DC/MPH with
National University of Health Sciences. The school also participates in the
Medical Scientist Training Program with the College of Medicine.

The School of Public Health is fully accredited by the Council on
Education for Public Health (CEPH), the only fully accredited school of
public health within Illinois. The MPH and DrPH degrees at UIC are
considered professional programs and are not administered by the
Graduate College. To learn more about the degree programs and how to
apply, please visit the following websites:
