Oral Medicine and Diagnostic Sciences (OMDS)

Courses

OMDS 332. Radiographic Interpretation. 1 hour.
Comprehensive radiographic diagnosis of odontogenic and nonodontogenic cysts and tumors, fibro-osseous lesions, osseous lesions, radiographic manifestations of systemic diseases. Course Information: Prerequisite(s): OMDS 315.

Reviews pertinent aspects of clinical oral pathology, oral medicine, and related medical topics of special significance to the dental practitioner. Course Information: Prerequisite(s): Junior standing in the Doctor of Dental Surgery program.

OMDS 337. Radiology Clinic II. 1 hour.
Production and interpretation of intraoral radiographs. Course Information: Prerequisite(s): OMDS 327.

OMDS 345. TMJ Disorders. 1 hour.
The anatomical, physiological, and psychological basis for temporomandibular (TM) disorders is presented. Differential diagnosis and treatment of TM disorders is discussed.

OMDS 347. Radiology Clinic III. 1 hour.
Production and interpretation of intraoral and extraoral radiographs, stressing panoramic technique. Course Information: Prerequisite(s): OMDS 327.

OMDS 424. Oral Pathology. 4 hours.
Diseases of teeth, periodontium, facial bones, muscles, nerves and mucous membranes of the oral region, and salivary glands. Introduction to clinical differential diagnosis. Course Information: Prerequisite(s): ANAT 312 and BCHE 411 and HSTL 451 and PHYB 321 and PATH 421.

OMDS 503. Graduate Oral Pathology. 2 hours.
Oral pathology for postgraduate students will cover the clinical and microscopic features of pathologic changes linked to oral-dental and systemic diseases. Course Information: Prerequisite(s): OMDS 424 or the equivalent. Recommended background: Prior academic coursework including biology, histology and other related sciences.

OMDS 519. Electron Microscopy Seminar. 1 hour.
A student speaker makes a seminar type presentation about a topic and follows this with a discussion involving electron microscopy. Course Information: Prerequisite(s): Consent of the instructor.

OMDS 527. Oral Biology Seminar. 1 hour.
Invited speakers present the progress of current research work in their field of interest related to oral tissues. Course Information: Same as HSTL 514. Satisfactory/Unsatisfactory grading only. Prerequisite(s): Consent of the instructor.

OMDS 529. Electron Microscopy in Dentistry. 1 hour.
Principles, theory, and practice of transmission and scanning electron microscopy, and energy dispersive x-ray microanalysis. Processing, sectioning, staining and examination of tissues. Course Information: Same as HSTL 515. Prerequisite(s): Consent of the instructor. Class Schedule Information: To be properly registered, students must enroll in one Laboratory and one Lecture.

OMDS 615. Seminar on Anesthesia and Pain Control in Dentistry. 1 hour.
Anesthesia and pain control in dentistry, use of behavioral and pharmacological interventions in anxiety and pain control including physiological principles of anesthesia. Course Information: Satisfactory/Unsatisfactory grading only. Prerequisite(s): Enrollment in a postgraduate program in dentistry and consent of the instructor.

OMDS 616. Pediatric Oral Pathology. 2 hours.
Review and discuss lesions of oral cavity and jaws involving pediatric patients. Differential diagnosis and management of dental patients are emphasized. Course Information: Same as PEDD 616. Prerequisite(s): Enrollment in a postgraduate program in dentistry.

OMDS 617. Radiology for the Dental Specialist. 1 hour.
Characteristics of disease are presented in terms of selecting the proper imaging modality and establishing a differential diagnosis. Advanced diagnostic imaging systems are evaluated for diagnostic yield. Course Information: Specific references to slides and class notes will be available at http://intranet/depts/radio/index.htm. Prerequisite(s): Professional standing limited to students in Advanced Certificate Programs.

OMDS 623. Temporomandibular Disorders. 1 hour.
The anatomical, physiological, and psychological basis for temporomandibular (TM) disorders is presented. Differential diagnosis and treatment of TM disorders is discussed.
