## Courses

**PERI 341. Surgical Periodontics. 1 hour.**
Theoretical and practical aspects of complex periodontal treatment with emphasis on current approaches to diagnosis, case management and surgical technique. Course Information: Prerequisite(s): PERI 338.

**PERI 351. Periodontics Clinic I. 1 hour.**
Introduces students to the management of periodontal diseases in the context of general dental practice as well as integrating basic and behavioral science into the clinical management of periodontal diseases. Course Information: Extensive computer use required.

**PERI 352. Periodontics Clinic II. 2 hours.**
Continuation of Peri 351. Management of periodontal disease in the context of general dental practice. Course Information: Extensive computer use required. Prerequisite(s): PERI 351.

**PERI 353. Periodontics Clinic III. 3 hours.**
Continuation of Peri 352. Management of periodontal disease in the context of general dental practice. Course Information: Extensive computer use required. Prerequisite(s): PERI 352.

**PERI 354. Periodontics Clinic IV. 2 hours.**
Students continue to improve skills and proficiency in the management of periodontal disease in the context of general dental practice as well as integrating basic and behavioral science into the clinical management of periodontal diseases. Course Information: Extensive computer use required. Prerequisite(s): PERI 353.

**PERI 355. Periodontics Clinic V. 3 hours.**
Continuation of Peri 354. Students improve skills and proficiency in the management of periodontal disease in the context of general dental practice. Course Information: Extensive computer use required. Prerequisite(s): PERI 354.

**PERI 356. Periodontics Clinic VI. 1 hour.**
Continuation of Peri 355. Students improve skills and proficiency in the management of periodontal disease in the context of general dental practice. Course Information: Extensive computer use required. Prerequisite(s): PERI 355.

**PERI 391. Advanced Periodontal Surgery Elective. 1 hour.**
Emphasis on surgical diagnosis, treatment planning and technique for inductive, resective and plastic periodontal surgical modalities in a clinical setting. Course Information: Satisfactory/Unsatisfactory grading only. Prerequisite(s): PERI 338 and completion of the third year clinical requirements.

**PERI 392. Periodontics Literature Review Seminar. 1 hour.**
Seminar to review current and classic periodontal literature with focus on topics not covered in the curriculum. Encouraged for students considering graduate studies in dentistry. Course Information: Satisfactory/Unsatisfactory grading only. Prerequisite(s): PERI 338 and senior standing in the Doctor of Dental Surgery program.

**PERI 610. The Biological Basis of Periodontics. 1 hour.**
Current concepts of host response mechanisms in gingival epithelium and connective tissues. Course Information: Prerequisite(s): Enrollment in the postgraduate program in periodontics or consent of the instructor.
