Periodontics (PERI)

Courses

PERI 610. The Biological Basis of Periodontics. 1 hour.
Current concepts of host response mechanisms in gingival epithelium and connective tissues. Course Information: Prerequisite(s): Enrollment in the postgraduate program in periodontics or the consent of the instructor.

PERI 611. Classic Periodontal Literature Review. 3 hours.
Historical and current clinical concepts of the etiology, pathogenesis, diagnosis and treatment of periodontal diseases are studied and evaluated by review of classic literature. Course Information: May be repeated. Prerequisite(s): Enrollment in the postgraduate program in periodontics or consent of the instructor.

PERI 612. Biochemistry of Periodontal Disease. 2 hours.
A lecture-seminar course that deals specifically with the biochemistry of periodontal structures and periodontal disease, the literature and the current advances in this area. Course Information: Prerequisite(s): BCHE 411.

Critical analysis, evaluation and interpretation of current literature in periodontology. Course Information: May be repeated. Prerequisite(s): Enrollment in the Periodontics Certificate Program.

PERI 614. Perio-Prosthesis. 1 hour.
The design of fixed prosthesis devices are studied and evaluated as they affect the periodontium. Course Information: Prerequisite(s): Admission to the postgraduate programs in periodontics or prosthodontics or consent of the instructor.

PERI 620. Periodontics Clinic. 2-16 hours.
Students treat a wide variety of basic and advanced periodontal conditions using all currently accepted treatment rationales and procedures. Course Information: Prerequisite(s): Admission to the postgraduate program in periodontics.

PERI 630. Periodontal Treatment Planning/Treatment Seminar. 1 hour.
Using student case presentations the etiology, diagnosis, pathogenesis, prognosis and treatment of a wide variety of periodontal diseases and conditions are discussed and studied. Course Information: May be repeated. Prerequisite(s): Admission to the Periodontics Certificate Program.

PERI 698. Periodontic Research. 1-10 hours.
A clinical or basic research experience related to periodontology and done under the guidance of a University of Illinois faculty member. Course Information: Satisfactory/Unsatisfactory grading only. Prerequisite(s): Admission to the postgraduate program in periodontics or consent of the instructor.
