PSCI 425. College of Pharmacy Colloquium Lecture Series. 1 hour.
Weekly, one-hour, basic-research seminars given by invited lecturers.
Course Information: Previously listed as BPS 425. May be repeated for
a maximum of 2 hours. Students will not be able to concurrently enroll in
PSCI 425 and PMPR 355 during the Spring semester.

PSCI 501. Drug Discovery, Design, and Development. 3 hours.
Provides an overview of the process to discover, design, develop, and
market drugs set in the background of chemistry and biology. Course
Information: Credit is not given for PSCI 501 if the student has credit in
BPS 507 or MDCH 507 or PMPG 507.

PSCI 502. Training in Research Presentation. 1 hour.
Provides practice and practical guidance for giving a high quality research
seminar. Course Information: Satisfactory/Unsatisfactory grading only.
Previously listed as MDCH 593.

PSCI 503. Biostatistics for Pharmaceutical Scientists. 2 hours.
Provides an introduction to basic statistical methods for pharmaceutical
scientists. Course Information: Extensive computer use required. Credit is
not given for PSCI 503 if the students have credit in BSTT 400.

PSCI 504. Science Writing and Storytelling. 1 hour.
Designed to use storytelling to write and communicate science more
effectively. Course Information: Satisfactory/Unsatisfactory grading only.
Extensive computer use required. Meets eight weeks of the semester.
Prerequisite(s): Consent of the instructor.

PSCI 510. Principles of Pharmaceutics and Drug Delivery. 3 hours.
Provides fundamental principles of pharmaceutics and drug delivery.
Course Information: Credit is not given for PSCI 510 if the student has credit in
BPS 501.

PSCI 519. Principles of Polymeric Science and Engineering. 3 hours.
Intermediate polymer science, thermodynamics of polymer solutions,
phase separations, MW determination, crystallization, elasticity, kinetics
and processing. Course Information: Previously listed as BPS 522.
Prerequisite(s): MATH 220; or consent of the instructor.

PSCI 520. Research Techniques in Pharmacognosy. 3 hours.
Provides an introduction to the techniques used in pharmacognosy
research. Course Information: Previously listed as PMPG 510.

PSCI 521. Structure Elucidation of Natural Products. 3 hours.
Provides an in-depth study of structure elucidation and dereplication
of a natural product using modern computational methods and real-
life examples. Course Information: Previously listed as PMPG 516.
Prerequisite(s): MDCH 562; or consent of the instructor.

PSCI 522. Advanced Pharmacognosy. 3 hours.
Provides an in-depth knowledge of the occurrence, biosynthesis and
activity profile of biologically active natural products from plants, marine
and microbial sources. Course Information: Previously listed PMPG 511.
Prerequisite(s): Credit or concurrent registration in PSCI 520; or consent
of the instructor or equivalent course.

PSCI 523. Special Projects in Pharmacognosy. 1-3 hours.
Overview of current research topics of interest in Pharmacognosy.
Course Information: Previously listed as PMPG 565. Prerequisite(s):
Completion of the first year of the program.

PSCI 530. Principles of Medicinal Chemistry. 5 hours.
Introduces concepts of graduate organic and physical organic chemistry
as they relate to medicinal chemistry. Emphasis will be made on those
topics of chemistry that are relevant to drug discovery and design. Course
Information: Previously listed as MDCH 561. Prerequisite(s): Credit
or concurrent registration in PHAR 422; or consent of the instructor.
Recommended background: One year of organic chemistry with
laboratory.

PSCI 531. Spectroscopy in Pharmaceutical Sciences. 3 hours.
The fundamental principles used to determine structure and conformation
in molecules, emphasizing spectroscopic methods useful in solving
structural problems and in analyzing dynamic biological processes.
Course Information: Previously listed as MDCH 562. Prerequisite(s):
Consent of the instructor or one year of physical chemistry.

PSCI 533. Drug Design. 2 hours.
Quantitative structure-activity relationships, computer graphics, molecular
modeling and simulation, and chemometrics as applied to drug design
and discovery. Course Information: No credit is given for PSCI 533 if
the student has credit in MDCH 572. Previously listed as MDCH 572.
Prerequisite(s): MDCH 561 or PSCI 530.

PSCI 591. Internship in Pharmaceutical Sciences. 1-12 hours.
Students spend time working in an entity unaffiliated with the department,
such as an industrial or specialized laboratory, to obtain professional
experience in a field of pharmaceutical sciences. Course Information:
May be repeated. Prerequisite(s): Consent of the instructor.

PSCI 592. Research Rotation in Pharmaceutical Sciences. 1-2 hours.
Research rotation course in which first year students from the
Pharmaceutical Sciences program will undertake projects in laboratories
affiliated with this program. Course Information: May be repeated to a
maximum of 4 hours. Students may register for more than one section
per term. Meets eight weeks of the semester. To be taken fall and spring
semesters of the first year of graduate study. Prerequisite(s): Consent of
the instructor.

PSCI 594. Special Topics in Pharmaceutical Sciences. 1-4 hours.
Covers at least one of the five concentrations of research in
pharmaceutical sciences: pharmaceutics & drug delivery,
pharmacognosy, chemistry in drug discovery, molecular mechanisms
and therapeutics, and forensics. Course Information: May be repeated
to a maximum of 4 hours if topics vary. Previously listed as MDCH 594.
Prerequisite(s): One year of physical chemistry and one semester of
biochemistry or consent of the instructor.

Independent research project under the guidance of an advisor. Course
Information: Satisfactory/Unsatisfactory grading only. May be repeated.
Prerequisite(s): Consent of the instructor.

Independent dissertation research under the guidance of an advisor and
committee. Course Information: Satisfactory/Unsatisfactory grading only.
May be repeated. Prerequisite(s): Consent of the instructor.
