Pharmaceutical Sciences (PSCI)

PSCI 425. College of Pharmacy Colloquium Lecture Series. 1 hour.
Weekly, one-hour, basic-research seminars given by invited lecturers.
Course Information: Previously listed as BPS 425. May be repeated for
a maximum of 2 hours. Students will not be able to concurrently enroll in
PSCI 425 and PMPR 355 during the Spring semester.

PSCI 485. Concentration Research. 2 hours.
Special independent study project of limited scope under the direction of
one or more faculty members with specialization in that area. The project
may require literature research related to the research project. Course
Information: May be repeated to a maximum of 4 hours. Extensive
computer use required. Prerequisite(s): Consent of the instructor and
admission to the Doctorate in Pharmaceutical Sciences.

PSCI 499. Special Projects in Pharmaceutical Sciences. 1-3 hours.
Special projects in Pharmaceutical Sciences. Course Information:
Previously listed as PMPG 499.

PSCI 501. Drug Discovery, Design, and Development. 3 hours.
Provides an overview of the process to discover, design, develop, and
market drugs set in the background of chemistry and biology. Course
Information: Credit is not given for PSCI 501 if the student has credit in
BPS 507 or MDCH 507 or PMPG 507.

PSCI 502. Training in Research Presentation. 1 hour.
Provides practice and practical guidance for giving a high quality research
seminar. Course Information: Satisfactory/Unsatisfactory grading only.
Previously listed as MDCH 593.

PSCI 503. Biostatistics for Pharmaceutical Scientists. 2 hours.
Introduction to statistical reasoning and experimental design followed
by a practical introduction to statistical tests. The course will rely
extensively on a flipped classroom model where students learn the basic
computational approaches through pro. Course Information: Extensive
computer use required. Meets eight weeks of the semester. Credit is not
given for PSCI 503 if the students has credit in BSTT 400.

PSCI 504. Science Writing and Storytelling. 1 hour.
Designed to use storytelling to write and communicate science more
effectively. Course Information: Satisfactory/Unsatisfactory grading only.
Extensive computer use required. Meets eight weeks of the semester.
Prerequisite(s): Consent of the instructor.

PSCI 510. Principles of Pharmaceutics and Drug Delivery. 3 hours.
Provides fundamental principles of pharmaceutics and drug delivery.
Course Information: Credit is not given for PSCI 510 if the student has
credit in BPS 501.

PSCI 518. Advanced Drug Delivery Systems. 2 or 3 hours.
Controlled drug delivery systems utilizing polymers, synthesis of different
types of devices, and the delivery expected from these devices, and
mathematical modeling of delivery systems. Course Information:
Previously listed as BPS 518. Prerequisite(s): Consent of the instructor.

PSCI 519. Principles of Polymeric Science and Engineering. 3 hours.
Intermediate polymer science, thermodynamics of polymer solutions,
phase separations, MW determination, crystallization, elasticity, kinetics
and processing. Course Information: Previously listed as BPS 522.
Prerequisite(s): MATH 220; or consent of the instructor.

PSCI 520. Research Techniques in Pharmacognosy. 3 hours.
Provides an introduction to the techniques used in pharmacognosy
research. Course Information: Previously listed as PMPG 510.

PSCI 521. Structure Elucidation of Natural Products. 3 hours.
Provides an in-depth study of structure elucidation and dereplication
of a natural product using modern computational methods and real-
life examples. Course Information: Previously listed as PMPG 516.
Prerequisite(s): MDCH 562; or consent of the instructor.

PSCI 522. Advanced Pharmacognosy. 3 hours.
Provides an in-depth knowledge of the occurrence, biosynthesis and
activity profile of biologically active natural products from plants, marine
and microbial sources. Course Information: Previously listed PMPG 511.
Prerequisite(s): Credit or concurrent registration in PSCI 520; or consent
of the instructor or equivalent course.

PSCI 523. Special Projects in Pharmaceutical Sciences. 1-3 hours.
Overview of current research topics of interest in Pharmaceutical
Sciences. Course Information: Previously listed as PMPG 565.
Prerequisite(s): Completion of the first year of the program.

PSCI 530. Principles of Medicinal Chemistry. 5 hours.
Introduces concepts of graduate organic and physical organic chemistry
as they relate to medicinal chemistry. Emphasis will be made on those
topics of chemistry that are relevant to drug discovery and design. Course
Information: Previously listed as MDCH 561. Prerequisite(s): Credit
or concurrent registration in PHAR 422; or consent of the instructor.
Recommended background: One year of organic chemistry with
laboratory.

PSCI 531. Spectroscopy in Pharmaceutical Sciences. 3 hours.
The fundamental principles used to determine structure and conformation
in molecules, emphasizing spectroscopic methods useful in solving
structural problems and in analyzing dynamic biological processes.
Course Information: Previously listed as MDCH 562. Prerequisite(s):
Consent of the instructor or one year of physical chemistry.

PSCI 532. Organic Medicinal Chemistry. 3 hours.
Organic reactions are discussed in terms of their mechanisms and
utility in the field of medicinal chemistry, particularly in the synthesis
of medicinal agents. Course Information: Previously listed as MDCH 560.
Credit is not given for PSCI 532 if the student has credit in MDCH 560.
Prerequisite(s): One year of organic chemistry with laboratory.

PSCI 533. Drug Design. 2 hours.
Quantitative structure-activity relationships, computer graphics, molecular
modeling and simulation, and chemometrics as applied to drug design
and discovery. Course Information: No credit is given for PSCI 533 if
the student has credit in MDCH 572. Previously listed as MDCH 572.
Prerequisite(s): MDCH 561 or PSCI 530.

PSCI 541. Pharmaceutical Applications of Genomics. 2 hours.
Introduction to genomics for advanced pharmacy and graduate students.
Principles of DNA sequencing and gene expression in human and
microbial genomes, with emphasis on diagnostics and therapeutic
applications. Course Information: Previously listed as PMMP 412.
Prerequisite(s): PHAR 423; or consent of the instructor.

PSCI 591. Internship in Pharmaceutical Sciences. 1-12 hours.
Students spend time working in an entity unaffiliated with the
department, such as an industrial or specialized laboratory, to obtain
professional experience in a field of pharmaceutical sciences. Course
Information: Satisfactory/Unsatisfactory grading only. May be repeated.
Prerequisite(s): Consent of the instructor.
PSCI 592. Research Rotation in Pharmaceutical Sciences. 1-2 hours.
Research rotation course in which first year students from the Pharmaceutical Sciences program will undertake projects in laboratories affiliated with this program. Course Information: May be repeated to a maximum of 4 hours. Students may register for more than one section per term. Meets eight weeks of the semester. To be taken fall and spring semesters of the first year of graduate study. Prerequisite(s): Consent of the instructor.

PSCI 594. Special Topics in Pharmaceutical Sciences. 1-4 hours.
Covers at least one of the five concentrations of research in pharmaceutical sciences: pharmaceutics & drug delivery, pharmacognosy, chemistry in drug discovery, molecular mechanisms and therapeutics, and forensics. Course Information: May be repeated to a maximum of 4 hours if topics vary. Previously listed as MDCH 594. Prerequisite(s): One year of physical chemistry and one semester of biochemistry or consent of the instructor.

PSCI 598. Master’s Thesis Research. 0-16 hours.
Independent research project under the guidance of an advisor. Course Information: Satisfactory/Unsatisfactory grading only. May be repeated. Prerequisite(s): Consent of the instructor.

Independent dissertation research under the guidance of an advisor and committee. Course Information: Satisfactory/Unsatisfactory grading only. May be repeated. Prerequisite(s): Consent of the instructor.
