Department Head, Abolfazl Mohammadian, kouros@uic.edu
Director of Undergraduate Studies, Hossein Ataei, hataei@uic.edu

Civil engineering is a broadly based discipline that encompasses many specialties. The civil engineering curriculum provides students with a strong background in engineering and applied sciences.

Civil Engineering Program Educational Objectives
Graduates of the Civil Engineering program at the University of Illinois Chicago will establish careers in engineering, research and development, and/or management professions and be involved in professional societies. Graduates of the program are expected within a few years of graduation:

a. To apply technical expertise, effective design skills, and sustainability principles to address evolving engineering challenges affecting a diverse society
b. To be engaged in continuing education. Motivated graduates will have pursued or have well-formulated plans to pursue graduate education
c. To effectively and ethically contribute as a member, manager, or leader of multidisciplinary teams through efficient communication of technical and non-technical issues

d. an ability to communicate effectively with a range of audiences.
e. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
f. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
g. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Civil Engineering Student Outcomes
The Civil Engineering Program at UIC is an ABET-accredited program and it follows and documents the ABET Student Outcomes (1) through (7) verbatim to support its Program Educational Objectives. Continuous assessment and attainment of these student outcomes prepare the graduates of the Civil Engineering program for professional practice. Students graduating from the Civil Engineering program at UIC will have:

a. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
b. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety,
