An undergraduate education in anthropology provides valuable preparation for many careers that involve working with individuals of diverse national or ethnic backgrounds. Undergraduate majors have found careers in global public health, healthcare services, social case work, cultural resource management, museum education, public housing, employment and personnel counseling, public office, the Peace Corps, field archaeology, import businesses, market research, the Foreign Service, and social and environmental planning. Anthropology majors are also well positioned to continue their education, not only to be career anthropologists, but to enter professions such as computer programming, law, medicine, business, urban planning, nonprofit management, and public administration.
