Pre-Public Health

The School of Public Health offers two baccalaureate degree programs: the Bachelor of Arts in Public Health and the Bachelor of Science in Public Health. The Bachelor of Arts in Public Health is geared toward students with an interest in the socio-cultural determinants of health and aims to prepare students for public health practice, community engaged work, and careers and graduate education focused on social justice in health and well-being. The associated selective course options for the Bachelor of Arts largely align with social sciences and humanities. The Bachelor of Science in Public Health is geared toward students seeking a deeper understanding of basic and applied sciences and aims to prepare students for graduate and professional degrees and career trajectories in fields such as epidemiology and biostatistics, dentistry, environmental and occupational health sciences, medicine, and pharmacy. The associated selective course options for the Bachelor of Science include an array of bench, lab, and applied sciences.

Direct admission to the Bachelor of Arts in Public Health or the Bachelor of Science in Public Health requires completion of 60 semester hours of specified General Education course work. However, students who have not yet completed the specified General Education course work necessary for direct admission are eligible to apply to the Public Health–Undecided (Pre-Public Health) program within the School of Public Health.

Please see below for information on the 60 semester hours of Pre-Public Health course work required for direct admission to the Bachelor of Arts in Public Health or the Bachelor of Science in Public Health as well as an overview of admission requirements.

Admission Requirements

Admission to Public Health–Undecided (Pre-Public Health)

New first year applicants interested in pursuing the Bachelor of Arts or Bachelor of Science in Public Health are eligible to apply to the Public Health–Undecided (Pre-Public Health) program within the School of Public Health. See the Admissions section of the Undergraduate Catalog for additional information.

New transfer applicants who have completed a minimum of 24 semester hours or 36 quarter hours of transferable college course work at the time of application but have not yet completed the specified General Education course work necessary for direct admission to the Bachelor of Arts or Bachelor of Science in Public Health are eligible to apply to the Public Health–Undecided (Pre-Public Health) program within the School of Public Health. See the Admissions section of the Undergraduate Catalog for additional information.

Current UIC students who have not yet completed the specified General Education course work necessary for direct admission to the Bachelor of Arts or Bachelor of Science in Public Health are eligible to apply as intercollege transfer applicants to the Public Health–Undecided (Pre-Public Health) program within the School of Public Health.

Admission to the Bachelor of Arts or Bachelor of Science in Public Health

Students apply for admission through the School of Public Health. Admission into the Bachelor of Arts in Public Health and Bachelor of Science in Public Health programs is selective and dependent on the availability of space. Students seeking direct admission to the Bachelor of Arts in Public Health or Bachelor of Science in Public Health programs must meet these minimum requirements:

a. Junior standing - completion of 60 semester hours of specified General Education course work at UIC or from any accredited community college or four-year college or university. Note: Students who have not yet completed the specified General Education course work necessary for direct admission to the Bachelor of Arts in Public Health or Bachelor of Science in Public Health programs are eligible to apply to the Public Health–Undecided (Pre-Public Health) program within the School of Public Health.

b. Specified General Education course work includes completion of 9 semester hours of introductory public health course work with a grade of B or better in each course (PUBH 100, PUBH 110, and PUBH 120). Special consideration will be given to students who have taken comparable prerequisites at community colleges or other four-year colleges or universities.

c. Minimum cumulative grade point average of 2.50/4.00. A 2.75/4.00 or above is recommended for priority consideration.

d. Personal statement of educational goals including reasons for selecting a public health degree.

e. One letter of recommendation from a professional or academic reference.

Early Admission to the Bachelor of Arts or Bachelor of Science in Public Health

While most students will follow the traditional pathway of entering the major upon completion of 60 hours of specified course work, early admission to the major is possible for high-achieving students. Students who have successfully completed at least 30 semester hours including
at least one of the three 100-level public health prerequisite courses
(PUBH 100, PUBH 110, or PUBH 120) with a minimum cumulative GPA
of at least 3.25/4.00, may apply to be admitted to the full major at the
beginning of the sophomore year. Students qualifying for early admission
will typically spread their core public health major course work over three
years rather than two.
